

Con-Argument for Prop 1C (Lottery Securitization)

The California lottery should be left as the voters originally intended it to be. When the voters approved the lottery twenty-five years ago, they had a clear understanding of how the program would function. They knowingly placed restrictions on the operation of the lottery in order to limit its size and scope. The Lottery has performed as it was designed to perform. There is no need to change or modernize the lottery. It should be left as the voters intended twenty-five years ago.

Please vote No.

State Senator Bob Huff
